Apologies to competitors for the poor placement of control 1 on the Petrifying course.

Planning visit here wasn't thorough enough to note there were actually 3 little buildings with various gaps in between where the control could have been.

Also control no. 4 on this course (a single tree) had a truly petrifying approach and departure route through a 'small marsh' which was surprisingly bad!

Thanks to Fred for control collection and an offer from Mike as well – much appreciated
